

DTG Pretreatment

Direct-to-garment Printers Employ Pretreatment, A Liquid Solution, To Enable The Printing And Washability Of White Ink Or Full-color Pictures On A Range Of Colored Shirts, Most Frequently Black Shirts. Direct To Garment Printing's Foundation Is Pretreatment. It Serves As The Base For Your Clothing. Any Ink Direct To Garment Printer Will Produce Superior Results With A Properly Applied Pretreatment.

Types of Materials

You May Sublimate A Variety Of Profitable Things, Including Cotton Fabric, Polyester Fabric, Fleece, Shopping Bags, Pillows, T-shirts, Canvases, And Caps.

Advantages Of DTG Pretreatment

Quick Drying Pretreatment Liquid, Which Saves Time.

Super Adhesion - Strengthens The Bond Between The Printing Surface And The Ink, Improving The Ink's Adherence.

Protection: The Pretreatment Makes The Surface More Resistant To Rubbing, Abrasion, And Ink Smearing.

Performance - The Coating Is Smooth To The Touch And Has A Lovely Glossy Finish, Providing A Pleasing Tactile Experience.

Product Instruction

Product Name: Ocbestjet Pretreatment Liquid Solution For Cotton Fabric, Polyester Fabric

Brand Name: Ocbestjet

Item Name : Pre-Coating for DTG Ink

Model : For Direct to Garment Printer

Ink Type : Coating Fluid

Color : White

Bottle Volume : 100ML 250ML 500ML 1000ML

Shelf Life : 24 Months

Suitable For: Dark & Light Garment

Suitable Material : For Cotton Fabric, Polyester Fabric

Feature : Harmless, Super Adhesion, Beautiful Glossy

DTG Pretreatment - 100ML

The Spray Bottle's Shape Makes It Simple To Push And Diffcult To Obstruct The Nozzle, Allowing For Uniform Application Of The Pretreatment To The Cloth.

DTG Pretreatment - 250ML

The Safety Buckle Design On The Bottle Makes It Simple To Push, Prevents Liquid Leaking, And Makes It Difficult To Obstruct The Nozzle.

DTG Pretreatment - 500ML

One Empty Spray Bottle Will Be Sent For Free With Every Bottle Of Pretreatment Liquid.

DTG Pretreatment - 1000ML

Empty Spray Bottle

You Can Refill The Pretreatment Liquid To The Bottle By Yourself.

How to Choose the Pretreatment Liquid?

Light Garment Pretreatment Is Used Mainly On White T-shirts Or White Material.

Without light garment pretreatment color ink is not bright enough

Dark Preparation Must Be Used If Any White Ink Is Required. It's The Colors Of The Graphic You're Printing, Not The Shirt's Color, That Matter.

Use DARK pretreatment:

White in image

Color Lighter than garment's color

Remember the rule of thumb, if you are using white ink no matter what color the shirt is you have to use dark pretreatment.

Imagine Pouring Milk Across A T-shirt And The Effect You Would Get If There Was No Pretreatment Since White Ink Would Sink Into The Cloth Without It.

Without dark garment pretreatment white ink
would absorb into the fabric

New Dtg Users Sometimes Aren't Sure Whether To Employ Light Pretreatment Or Dark Pretreatment.

You Would Use A Mild Pretreatment With A Light Pink Blouse, Correct?

Most Of The Time, The Answer Is No; However, It Also Depends On The Color Of The Image You Are Printing.

There is a very simple rule to remember:

No Matter What Color The Shirt Is, You Must Use A Dark Pretreatment If You Are Printing With Any White Ink.

How to Use the Pretreatment Liquid?

1. Use heat press machine to iron the clothes first.
Temperature:170 degrees
Time:20 seconds

2. Spray the treatment liquid on the clothes evenly.

3. Then use the heat press machine to dry the clothes.
Temperature:170 degrees
Time:50 seconds

6. Design the patterns you want to print in advance.
Then printing white color base first.

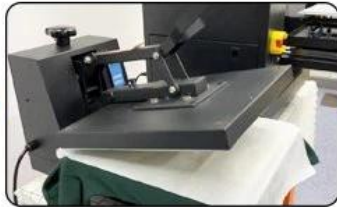

5. Move the platform to the original position for printing. Now can start Printing.

4. Put the clothes on the printing platform. Fasten the clothes down.

7. Move the platform to the starting position of printing again. Then start printing CMYK color.

8. Put the clothes on the heat press machine.
Temperature:170 degrees
Time:50 seconds

9. After the hot pressing step is complete. Done.

Applicable Material

Excellent Canvas, Cotton, And Mixed Fabric Printing.

T-shirts, Hang Tags, Hang Bags, Silk, Wool, Cashmere, Nylon, Scarves, Bed Sheets, Curtains, And Household Items May All Be Personalized.
